

Felipe Escalona

Web developer

I'm a web developer specialized in Node.js, Express, React.js, Next.js, and React Native. With a solid foundation in Zebra Technologies, my passion for technology has guided my continuous learning and expertise. Beyond web development, I've ventured into the IoT world with Arduino, designing innovative solutions bridging the digital and physical realms. My experience with Zebra Technologies spans from barcode printing to data capture, always striving to innovate and optimize processes.

2019 - current

Symtechven

Web Project Manager

In my current role, I play a pivotal position overseeing client projects across diverse industries, harnessing the power of Zebra's Enterprise Browser. My responsibilities encompass designing, managing, and optimizing web applications tailored to meet the unique needs of our clients. I am adept at utilizing Zebra's hardware, including scanners, voice recognition systems, NFC, and handheld computers. Furthermore, I specialize in leveraging Zebra's IoT connector and RFID technology, enabling real-time tracking and updating of item locations. This data is seamlessly integrated into MySQL and PostgreSQL databases, ensuring efficient and accurate data management to benefit our clientele.

2017 - 2019

Symtechven

Junior developer

In my previous role as a Junior Developer, I actively contributed to numerous web development projects, serving a diverse range of clients. My tasks encompassed designing and implementing web pages and creating straightforward forms utilizing both React and vanilla JS. A crucial aspect of my role was also updating and maintaining the clients' databases, ensuring timely and accurate data management.

Symtechven

Printer repair

In my first professional role, I worked as a technician specializing in Zebra printers and scanners, among other equipment. My responsibilities were multifaceted, ranging from technical service tasks like repairing print heads and rollers to addressing various printer-related issues. In addition to hands-on repairs, I took the initiative to conduct training sessions, educating clients and colleagues on the best practices for maintaining and prolonging the life of the equipment.
